

Corporate Partnership Program

The Science Zone has been evolving throughout its existence into what it is today. It could not have achieved its level of excellence without the unwavering help and support from the community and the partnerships created over the years.

We rely on grants, monetary and in-kind donations to keep our doors open to offer stellar enrichment opportunities in the summer and after school hours.

Our Mission: The Science Zone strives to be the premier science center in Central Wyoming by offering quality programming, educators, and exhibits. We provide high-interest, hands-on learning experiences for all ages, thereby making involvement in S.T.E.M.* an integral part of our patrons' lives.

**Science Technology Engineering Math*

Our museum serves over 30,000 children within the state of Wyoming each year. We educate, and inspire young minds through our museum content, outreach programs, partnership with the school district, and other affiliations. We are able to provide scholarships to families less fortunate, enabling their children to attend high quality summer camps, engaging after school programs, and general museum attendance through partnerships and grants from the community.

Goals at the Science Zone are important to our mission and culture, which is why we are asking your help in achieving our goal of becoming the premier science center in central Wyoming. Our growth through community partnerships is vital to the success of our organization and the children and families we serve.

Please see the attached Corporate Partnership Program pricing sheet and let us know how you would like to contribute to our organization!

Thank you,

Steven Schnell
Executive Director
The Science Zone

Corporate Partnership Program

Exhibits: Rented exhibits are cycled throughout the course of the year. These exhibits come from science centers and exhibit shops all over the country and cover a wide variety of topics. We will highlight your organization during the run of the exhibit when you sponsor the fees associated with the exhibit rental.

Free days: We run several free admission days throughout the course of the year. This gives those in the community who wouldn't normally come down the opportunity to experience and explore the Science Zone at no cost. By covering the operational costs and admission income for that day your organization will be highlighted during the free day. Under certain circumstances we would be able to offer a booth in our foyer for your representatives to solicit key services provided by your organization.

In-Kind Donations: There are many moving parts that make up the Science Zone. From time to time each piece may require some type of maintenance. Donations of labor, time and materials are just as needed as monetary donations. Areas of need are; plumbing, electrical, cleaning, floor care, carpet cleaning / repair, computer / IT support, veterinary services, printing, accounting services, snow removal, sign making, and much more. Please let us know if your organization would like to be our partner for any of the above services.

Volunteerism: Throughout the course of the year we need volunteers for tasks ranging from installing or removing exhibits, moving exhibits around the Science Zone, filling in for front desk staff, leading exhibit tours and much more. If you or your organization has the ability to send volunteers in time of great need, please let us know how we can contact and best utilize your human capital.

Your organization will be recognized on our website under our corporate partnership page and will be given a special place on our Partnership wall.

Looking for something a little different? Ask us about our corporate sponsorship program.
