

Corporate Sponsorship Program

The corporate sponsorship program at the Science Zone gives you marketing access to people all over the state of Wyoming. We see over 20,000 visitors every year coming through our doors. Having your company's logo on our marketing materials and social media pages is a perfect avenue for your organization to be seen across the state and especially the greater Casper metropolitan area of over 75,000 people.

Our Mission: The Science Zone strives to be the premier science center in Central Wyoming by offering quality programming, educators, and exhibits. We provide high-interest, hands-on learning experiences for all ages, thereby making involvement in S.T.E.M.* an integral part of our patrons' lives.

**Science Technology Engineering Math*

Our museum serves over 30,000 children within the state of Wyoming each year. We educate, and inspire young minds through our museum content, outreach programs, partnership with the school district, and other affiliations. We are able to provide scholarships to families less fortunate, enabling their children to attend high quality summer camps, engaging after school programs, and general museum attendance through sponsorships and grants from the community.

Goals at the Science Zone are important to our mission and culture, which is why we are asking your help in achieving our goal of becoming the premier science center in central Wyoming. Our growth through community sponsorships is vital to the success of our organization and the children and families we serve.

Please see the attached Corporate Sponsorship Program pricing sheet and let us know how you would like to contribute to our organization!

Thank you,

Steven Schnell
Executive Director
The Science Zone
