Using Energy

By ______________

Draw a picture to show how we use each kind of energy.

We use the sun ________________
We use electricity ________________

We use batteries ________________
We use gasoline ______________

We use wind ________________
Draw a picture of the circuit your class created. Make sure to label all your materials (battery, wire, light bulb).

Have your teacher use a wire cutter to cut one of the wires. Draw the circuit now. Make sure to label all your materials (battery, wire, light bulb).
Cut on dotted lines and then fold on solid line. Under each flap, draw an example of how we use each object.
Cut on dotted lines and then fold on solid line. Under each flap, draw an example of each kind of energy.

- Heat
- Light
- Sound
<table>
<thead>
<tr>
<th>Heat</th>
<th>Light</th>
<th>Sound</th>

<td></td>
</tr>
</tbody>
</table>
Color and cut out the pictures. Glue each picture under the correct kind of energy (heat, sound or light?). Some pictures may have more than one answer so choose one and make sure you are able to explain why you chose it!
Saving Energy

Some types of energy will not last forever. How can we make sure we are not wasting energy? Write your answer next to each picture.
